

Project Collaboration Tool

Objectives

- Develop a collaborative project management tool for teams to plan, track, and deliver work.
- Support task management, timelines, file sharing, and real-time team communication.
- Provide visibility into project progress with dashboards and milestone tracking.

Deliverables

- A fully functional Project Collaboration Tool.
- Project and team creation with member role assignments.
- Task boards (Kanban) with drag-and-drop functionality.
- Gantt chart for milestone and timeline visualization.
- Integrated team messaging and file sharing.

Requirements

- HTML: Structure project boards, task cards, and communication panels.
- CSS: Design a modern and productive workspace UI.
- JavaScript: Power drag-and-drop boards, real-time updates, and charting.
- Backend: Manage projects, tasks, users, permissions, and notifications.
- Database: Store projects, tasks, users, messages, and files.

Advanced Features

- Time Tracking: Log billable and non-billable hours per task.
- Dependency Management: Define and visualize task dependencies on the Gantt chart.
- Custom Workflows: Configure project-specific task stages and transitions.
- Goal Tracking: Define OKRs and track key results within projects.
- Client Access: Invite clients to view project progress without full access.
- Recurring Tasks: Automate creation of repeated tasks on a schedule.
- Resource Management: View team capacity and workload across all projects.

- Integration Support: Connect with GitHub, Slack, or Google Drive.
- Mobile Responsiveness: Full mobile support for remote team collaboration.
- Analytics Dashboard: Project health, task completion rates, and team productivity.
- Payment Gateway: Process team subscription payments via Stripe with per-seat or flat-rate options.
- Client Billing Reports: Generate and send invoices to clients for time-tracked billable project hours.
- Expense Logging: Allow team members to log project expenses with receipt uploads for reimbursement.
